

SAT 108-250 AH

Sat 108-250 AH is a solution optimized for fixed installation. Dedicated, simple to use, flying kit was design to provide precise adjustment for any interior. Operating in a full range, can provide quality background music source or with subwoofer section full range dancing music system for small to medium pubs and clubs. Smoothly designed enclosure is covered with texture paint and front is covered with steel grill and foam.

Features

- Asymmetrical horn
- Smooth design
- Flat amplitude and phase response
- Dedicated flying kit
- Compact enclosure

Application

- Clubs
- Pubs
- Restaurants
- Cinemas

Frequency range	60 Hz-20 kHz
AES Power	250 W
Program Power	500 W
SPL (1 W/1 m)	95 dB
Components	LF: 8" / 2" HF: 1" / 1"
Impedance	8Ω
Enclosure	High grade plywood, flying points
Finish	Black texture paint, front coveret with steel grill and foam.
Dimensions (HxWxD) [mm]	425x315x294
Weight	11 kg
Flying system	Top flying points for SAT RIG 001 or SAT RIG 002
Dispersion	H 90° ÷ 60° (asymmetrical horn) V 55°
Optionall Accessories	
Flying kit	SAT RIG 001, SAT RIG 002
Finish options	Standard is color is black. As an option it enclosure can be covered with RAL color.

Low distortions makes the sound clear and precise in reproduction of source signal. Coverage pattern is being shaped by asymmetric horn used for high frequency unit. Wider angle for near field and more narrow dispersion for far field limits reflections from walls putting the sound exactly where you need it.

Compact enclosure equipped with 8" mid-bass with high power handling and 1" high frequency unit with asymmetrical horn creates very elastic solution for installation in places where there is very little space and . SAT 108-250 AH is a perfect tool for sound reinforcement in objects where there is very little space and a need for a quality sound.

Advanced passive crossover design allowed to achieve flat, phase and amplitude, response. Enclosure is made of high grade, durable plywood.
